

# TEXT MESSAGE NOTIFICATIONS

Text message notifications gives you faster transparency into key events within your shop. When a service order is ready to review, or parts need to be priced, get a text message to your cell phone and keep wrenches turning.

## Text Message Notifications give your shop:

- ✓ Your team can choose which events they receive a notification for.
- ✓ Text's sent directly to an employee's cell phone
- ✓ Set "do not disturb" hours.

## What is the impact on your shop?

- ✓ Empower your team to react faster when key events happen.
- ✓ Get freedom from the shop without sacrificing visibility and action.
- ✓ Remove communication gaps that slow down productivity.

## How does the integration work?

- ✓ Each Fullbay user that wants to receive text message notifications adds their phone number.
- ✓ Toggle which key events send text messages to which users
- ✓ Enjoy your new and improved shop communication!

## Ease of implementation:

1. Turn on Fullbay Connect
2. Make sure your employees and customers have a cell number in Fullbay
